Completed Projects:

National Park Weather Project:

<https://felix1805.github.io/State-Park-Weather/>

First completed group project. Designed using HTML, JavaScript and custom CSS framework to display a list of National US parks by state with relevant weather information listed for each park.

Password Generator:

<https://felix1805.github.io/password-generator/>

A password generator designed using JavaScript to generate a random password of up to 128 characters.

Workday Calendar:

<https://felix1805.github.io/Workday-Calendar/>

This workday calendar was developed using a combination of JavaScript and html, it utilizes a user's local storage system to keep track of previously listed events.

Team Profile Generator:

<https://felix1805.github.io/Team-Profile-Generator/>

This project required constructing a team profile generator that utilizes a command line application to take in specific employee information for a manager, along with a team of engineers and interns. The information collected is targeted toward each employee group, taking in GitHub information for engineers, along with an office number for the manager and school information for interns. This information is then pushed to an html file that generates with the above information on an easy-to-read web page.

Note Taking Application:

<https://felix1805.github.io/Note-Taking-Application/>

This tool was created in order to take and save notes within a web application. It uses express.js functionality on the back end and generates a .JSON file within the db database folder.

Bachelor of Science, University of North Carolina, Greensboro

January 2009 — December 2013

- Bachelor of Science program in International Business
- Minor in Economics with a concentration in Management

High School Diploma, Canadian International School of Egypt, Cairo

August 2003 — June 2006
